DML Commands – INSERT, SELECT

AIM:

To perform **Data Manipulation Language (DML) commands** such as **INSERT** and **SELECT** on the Saveetha Hospital database tables.

Procedure:

PROCEDURE:

Step 1: Select the database containing the HOSPITAL table.

Step 2: Insert movie details into the HOSPITAL table using the INSERT statement.

Step 3: Verify that the records have been inserted successfully.

Step 4: Retrieve all the records from the HOSPITAL table using the SELECT statement.

Step 5: Verify the displayed records.

Description

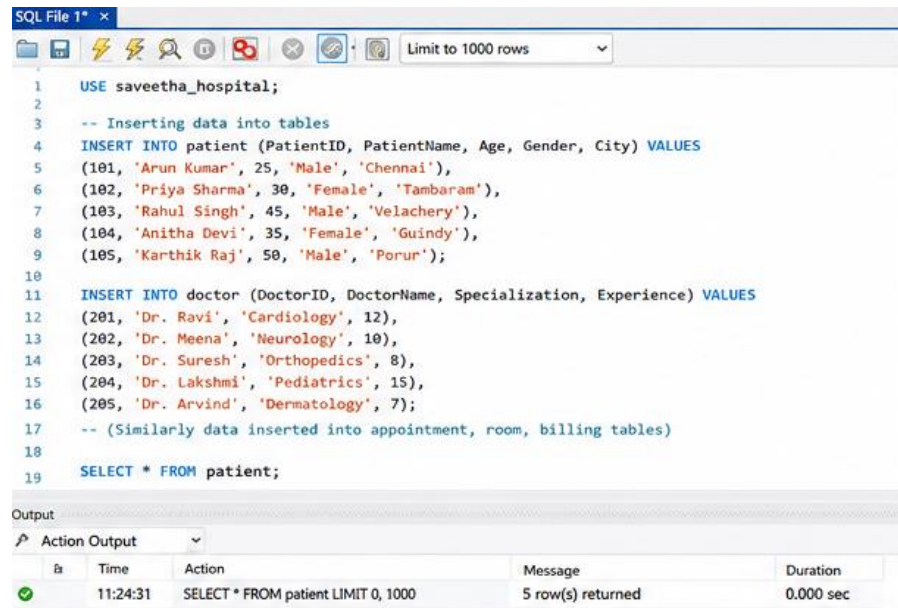

Data Manipulation Language (DML) statements are used for managing data within schema objects.

DML Commands

- INSERT – Inserts data into a table.
- SELECT – Retrieves data from a table.
