

EX.No. : 4

DML Commands with Constraints–UPDATE, DELETE

Aim:

To perform Data Manipulation Language (DML) commands such as UPDATE and DELETE on the Saveetha Hospital patient table.

Description:

DML statements are used for managing data stored in database tables. UPDATE modifies existing records, while DELETE removes records that satisfy a specified condition.

UPDATE syntax: UPDATE table_name SET column1=value1, column2=value2 WHERE condition;

DELETE syntax: DELETE FROM table_name WHERE condition;

Saveetha Hospital Dataset

Table: patients(patient_name, ward, treatment, doctor, operation, operation_fee)

Questions and Outputs

1. Update the treatment of the patient whose name is 'Ajay' to 'Heart Block'.

```
mysql> update patients set treatment='Heart Block' where patient_name='Ajay';
Query OK, 1 row(s) affected (0.02 sec)
Rows matched: 1 Changed: 1 Warnings: 0

mysql> select * from patients;
+-----+-----+-----+-----+-----+-----+
| patient_name | ward | treatment | doctor | operation | operation_fee |
+-----+-----+-----+-----+-----+-----+
| Ajay         | 534  | Heart Block | Astromeg | Yes       | 100000        |
| Tharun       | 213  | Accident   | Nylor   | Yes       | 100000        |
| Aishu        | 413  | BP         | BP Tablet | No        | 5000          |
| Arun         | 321  | Heart      | Borevita | No        | 10000         |
| Raja         | 247  | Tyroid     | Tyroid   | Yes       | 10000         |
| Harish       | 412  | Cold       | Paracetamol | No       | 1000          |
| Vadivu       | 631  | Fever      | Paracetamol | No       | 1000          |
| Ashitha      | 443  | Lung Cancer | Amino   | Yes       | 50000         |
| Kamini       | 881  | Cancer     | Diet     | Yes       | 100000        |
| Balaji       | 921  | Stomach Pain | Paracetamol | No       | 1000          |
+-----+-----+-----+-----+-----+-----+
10 row(s) in set (0.00 sec)

mysql>
```

2. Delete the patients who have no operation.

```
mysql> delete from patients where operation='No';
Query OK, 5 row(s) affected (0.02 sec)

mysql> select * from patients;
+-----+-----+-----+-----+-----+-----+
| patient_name | ward | treatment | doctor | operation | operation_fee |
+-----+-----+-----+-----+-----+-----+
| Ajay         | 534  | Heart Attack | Astromeg | Yes       | 100000        |
| Tharun       | 213  | Accident    | Nylor   | Yes       | 100000        |
| Raja        | 247  | Thyroid     | Thyroid | Yes       | 10000         |
| Ashitha     | 443  | Lung Cancer | Amino   | Yes       | 50000         |
| Kamini      | 881  | Cancer      | Diet    | Yes       | 100000        |
+-----+-----+-----+-----+-----+-----+
5 row(s) in set (0.00 sec)

mysql>
```

3. Modify the operation fee for the patient whose name is 'Raja' to 15000.

```
mysql> update patients set operation_fee=15000 where patient_name='Raja';
Query OK, 1 row(s) affected (0.02 sec)
Rows matched: 1 Changed: 1 Warnings: 0

mysql> select * from patients;
+-----+-----+-----+-----+-----+-----+
| patient_name | ward | treatment | doctor | operation | operation_fee |
+-----+-----+-----+-----+-----+-----+
| Ajay         | 534  | Heart Attack | Astromeg | Yes       | 100000        |
| Tharun       | 213  | Accident    | Nylor   | Yes       | 100000        |
| Aishu        | 413  | BP          | BP Tablet | No        | 5000          |
| Arun         | 321  | Heart       | Borevita | No        | 10000         |
| Raja        | 247  | Thyroid     | Thyroid | Yes       | 15000         |
| Harish       | 412  | Cold        | Paracetamol | No       | 1000          |
| Vadivu       | 631  | Fever       | Paracetamol | No       | 1000          |
| Ashitha     | 443  | Lung Cancer | Amino   | Yes       | 50000         |
| Kamini      | 881  | Cancer      | Diet    | Yes       | 100000        |
| Balaji      | 921  | Stomach Pain | Paracetamol | No       | 1000          |
+-----+-----+-----+-----+-----+-----+
10 row(s) in set (0.00 sec)

mysql>
```

4. Remove all patients whose operation fee is greater than 65000.

```
mysql> delete from patients where operation_fee > 65000;
Query OK, 3 row(s) affected (0.02 sec)

mysql> select * from patients;
+-----+-----+-----+-----+-----+-----+
| patient_name | ward | treatment | doctor | operation | operation_fee |
+-----+-----+-----+-----+-----+-----+
| Aishu        | 413  | BP          | BP Tablet | No        | 5000          |
| Arun         | 321  | Heart       | Borevita | No        | 10000         |
| Raja        | 247  | Thyroid     | Thyroid | Yes       | 10000         |
| Harish       | 412  | Cold        | Paracetamol | No       | 1000          |
| Vadivu       | 631  | Fever       | Paracetamol | No       | 1000          |
| Ashitha     | 443  | Lung Cancer | Amino   | Yes       | 50000         |
| Balaji      | 921  | Stomach Pain | Paracetamol | No       | 1000          |
+-----+-----+-----+-----+-----+-----+
7 row(s) in set (0.00 sec)

mysql>
```

RESULT: UPDATE and DELETE DML commands are successfully performed on the Saveetha Hospital patient table.
